

(WHITEDUSTER) White Crusader - Hand Duster

The original 1964 White Crusader hand duster specially designed to apply dust insecticides such as Borid, Drione, Delta Dust, etc. Simply fill the White Crusader Duster half full with your favorite dust and replace the lid. Then lightly squeeze the duster to apply the dust into cracks, crevices, voids, etc. Squeeze softly and a little comes out. Squeeze hard and a lot comes out. Your hand pressure controls the amount of dust applied. If the tip becomes clogged with lint or trash, a small cleanout tool is located on the backside to clean the tip. Every Do-It-Yourselfer and Professional should have a White Crusader Duster !
