

GREEN LIGHT
ANT KILLER GRANULES
Mound And Perimeter Treatment
**For Use On Vegetable Gardens,
Flower Gardens, Lawns**

Active Ingredient: Bifenthrin 0.1%

Sizes: 4 pound bag

Usage & Application:

Directions: *Green Light Ant Killer Granules* can be applied as a band treatment around the house foundation at a rate of 1.2 to 2.4 pounds over a 1,000 sq. ft. area. Use any hand or power operated gravity or rotary type spreader designed for the application of granular products. Apply when insects first appear and retreat as necessary every 7 days and only if there are signs of renewed insect activity. Thoroughly water the area immediately after application for optimum control of pests. Treats up to 3,000 sq. ft.

As a mound treatment, apply 1 tablespoon of **Green Light Ant Killer Granules** uniformly to the surface of each mound. Best results are obtained if the following are observed:

- Apply early morning or late evening hours when temperatures are between 65° to 80°F
- Do not disturb ants
- As new mounds appear, treat as soon as possible
- Thoroughly water the treated area immediately after application.
