ENVIRONMENTAL HAZARDS

This product is highly toxic to aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

Do not contaminate water when disposing of equipment washwaters.

This chemical demonstrates the properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

ORNAMENTAL PESTS

MERIT 2.5 G Ornamental Insecticide is for use on ornamental shrubs and small trees in outdoor landscapes and interior plantscapes. MERIT 2.5 G is a systemic product and will be taken up by the roots and translocated upward within the plant system. Therefore watering after application makes the product more available for uptake.

Systemic activity using this soil application treatment method can be delayed until the active ingredient is translocated throughout the plant. For this reason, applications work best when made prior to pest infestation or before pest populations become severe.

PESTS CONTROLLED

Aldegids	Leaf beetles (including Elm leaf and
Aphids	Viburnum leaf beetles)
Black vine weevil (larvae in soil)	Leafhoppers
Japanese beetle (adults)	Psyllids
Lace bugs	Whiteflies

WHERE TO APPLY	• Shrubs and small trees in outdoor landscapes and interior plantscapes.
USE RATE	<ul style="list-style-type: none"> • Select rate according to height of shrub or tree: Up to 4 ft.- use 1/4 to 1/2 cup 4 to 8 ft.- use 1/2 to 1 cup • Use high rate for initial treatment and lower rates for re-applications, if needed. • Not recommended for shrubs or trees greater than 8 feet tall. Instead use soil applications of other MERIT products approved for use on shrubs and trees.
HOW TO APPLY	• Spread appropriate rate evenly around the base of plant under foliage.
WHEN TO APPLY	<ul style="list-style-type: none"> • When pests are seen or found. • Re-apply as needed based on pest re-infestation or at 4 – 8 week intervals.
FOR BEST RESULTS	<ul style="list-style-type: none"> • Apply early before pest populations become severe. • Irrigation or rainfall should occur shortly after application. • Pull back mulch and weed barrier before application. • Avoid application to frozen or water-logged areas, as this may decrease the product's effectiveness.
ANT MANAGEMENT	<ul style="list-style-type: none"> • Use MERIT 2.5 G Ornamental Insecticide to control aphids and other sucking pests on ornamentals to limit the honeydew available as a food source for ant populations. MERIT applications can then be supplemented with residual sprays, bait placements or other ant control tactics to further reduce pest populations.
