DIRECTIONS FOR USE

Microplex is a complete Trace Element Mixture for use in total nutrient feeding solutions. **Microplex** is only to be used on crops grown in organic media.

APPLICAITON RATES

POT PLANTS AND SHRUBS

10 - 20 g/1000ℓ in final solution continuously.

SEEDLINGS

10 - 20 g/1000ℓ in final solution 2 -3 times during growing cycle.

CUCUMBERS AND TOMATOES IN GREENHOUSES

20 g/1000ℓ in final solution continuously.

Microplex can also be used as a foliar spray at the rate of 0.25 g - 0.5 g per litre water. The use of a wetter is advised.

When **Microplex** is used at the rate of 20 g per 1000 ℓ final solution it will give the following quantities expressed in ppm. (mg/ℓ)

Fe	Mn	Zn	Cu	B	Mo
1.68	0.4	0.2	0.03	0.5	0.05

**STORE IN A SEALED CONTAINER AWAY FROM LIGHT.
KEEP DRY.**
