

GREEN LIGHT
ORGANIC SPOT WEEDER
Ready-To-Use

**Non-Selective, Post-Emergent Herbicide For Grassy And
Broadleaf Weeds.**
Kills – Works Within Hours Of Application.

Active Ingredients:	Eugenol	2.5%
	Phenyl Propionate	2.5%

Size: 24 fl. oz. RTU

Usage & Application:

Green Light Organic Spot Weeder is a contact, non-selective, broad-spectrum, foliar herbicide. This product controls both grassy and broadleaf weeds. The herbicide must be applied thoroughly to the foliage (leaves) of weeds to be effective. Control is less effective when weeds are inactive, mature, or perennial. It will affect only those portions of weeds that are treated with the spray solution. Shake well before using.

Coverage is very important. The better the foliar coverage, the better the product will perform. For best results, apply the product in sunny, warm weather. Leaf damage should be visible on most weeds within hours of application. Cool or cloudy weather may slow the activity of this product and delay or reduce effects. The product is most effective on weeds less than 4 inches in height. Multiple applications may be necessary for effective control of larger weeds. Repeat applications will be necessary for new weeds emerging from seed or re-growth of previously treated vegetation. Do not allow spray solution to contact desirable vegetation. If this occurs, wash off with water immediately to prevent damage to desirable plants.

Weeds controlled: Annual Bluegrass (*Poa Annua*), Annual Morningglory, Barnyardgrass, Black Nightshade, Chickweed, Clover, Crabgrass, Dallisgrass, Foxtail, Goosegrass, Henbit, Johnsongrass, Lambsquarters, Nutsedge (Yellow), Pigweed, Purslane, Spurge, Thistle, Velvetleaf, Witchgrass, and many other weeds. Apply in a manner to provide complete and uniform coverage of weeds. Be sure to get good coverage of underside of leaves and main stem. Repeat treatment as necessary.

Green Light organic products were developed to provide the user with effective alternatives that are safe for children, pets, and the environment. **Green Light Organic Spot Weeder** is 100% organic and controls weeds. The product must be applied to actively growing weeds to be effective. The better the coverage of the weed, the better it works.
