

GREEN LIGHT SOIL INSECT KILLER

Apply May to Mid-August.
**One Application Kills White Grubs, Mole Crickets,
and European Crane Fly Larvae.**

Active Ingredient: Imidacloprid 0.22%

Size: 10 Pound Bag
(Treats Up To 3,484 Sq. Ft.)

Usage & Application:

Target Pests: White Grubs, Mole Crickets, and European Crane Fly Larvae.

Lawn Application Instructions: Make sure that the spreader works properly and spreads granules uniformly. Apply to the border and then fill in the center to ensure the entire area is covered completely. To make sure that the product is evenly distributed, walk at a steady pace making parallel passes. Do not use a spreader that applies granules in narrow, concentrated or uneven bands. **Water thoroughly after application.**

For best results:

- Apply early before Grubs, Mole Crickets, and European Crane Fly Larvae hatch.
- Irrigate thoroughly within 24 hours of application to form a protective zone in the soil.
- Avoid mowing until granules are watered into the soil.
- Do not apply to water saturated areas. This may decrease product effectiveness.
- This product can be applied over soil or mulch. Remove black plastic or other weed barrier material prior to application.

Keep children and pets off treated area until it has dried.

Flower Bed, Ground Cover, Tree, and Shrub Application Instructions: Apply at the rate of 2 tablespoons per 10 square feet of planting bed (1¼ cups per 100 square feet of planting bed). Evenly spread granules to the soil over flower beds, ground cover plantings, shrub beds, and under trees. The use of a hand-held spreader is recommended. Rake granules into the soil around plants. **Water thoroughly after application.**

Spreader Settings

Rate for Grubs and European Crane Fly Larvae: 2.87 lbs. per 1,000 square feet.

Rate for Mole Crickets: 3.8 lbs. per 1,000 square feet.
